## OUR SAINT BERNARD MAKES HISTORY AGAIN

By John Cox

In July 2003, our "son" "Kris" (**CH, WDCH, XmaxKris Van 't Hof Ten Eynder VCD2, UDX, MXP2, MJP, DD**) finished his Master Jumpers Preferred title, which matched up with his Master Standard Preferred agility title earned a few weeks earlier.

At the time Kris finished both Master titles, I felt it was wise to retire Kris from agility and give the UDX a try (he earned his UD in April of 2002). So it was off to school for a brush-up and we started showing again in obedience in November 2003. Well, as work and luck would have it, eight months later, in July of 2004, Kris had the UDX title under his keg. Now what?

As fall came, we went into the tracking fields to work on a TDX title. This filled some weekends but there were also weekends spent at agility trials, as his Pembroke Corgi sister was finishing up her Master Standard Preferred title. Just sitting on the sidelines offering moral support was great but the itch to run again became overwhelming.

I did have concerns about running Kris in agility again as he was nearing six years of age, plus he is a 150-pound Saint Bernard! On the other hand, he is so muscled and conditioned from his exercise program we thought we would just run him once or twice for fun. Yea, right!

Well, before we knew it Kris was within striking distance of his **MXP2** title. This dog LOVES agility and rips around the courses with glee, flews and ears flying and the tail wagging. The obedience background sure has helped Kris as we can maneuver the courses with great control. He is easily called off, if needed, from heading in the wrong direction or is about ready to take a wrong course. In just a few months of showing he had *mastered* his MXP2. Next in our sights is MJP2 (Master Jumpers Preferred 2). We have six legs left to go on that title. Kris's jumper legs are a little harder to achieve, as the course times are faster. Couple this fact with a 30-inch 150-pound dog, which has to squeeze through several 24" tunnels--it eats up the clock time.

**Did I mention the weave poles?** With LOTS of length of body, he is weaving and twisting through almost FIVE weave poles at the same time! He is accurate but being a GIANT breed can work against him when it comes to making time if there are more than two tunnels on the Jumpers with Weaves course.

Not bad for a breed champion! Sue is so good about sewing new buttons on my shirts as I pop them off with such pride in our son Kris!
