In February of 2021, AKC offered an Agility Course Test Jumpers. There are 2 levels ACT1J which includes jumps and maybe a tunnel, ACT2J which will also include 6 weave poles. The ACT program is a great way to give agility a try. The jumps can be set at any height. The courses have 10 to 12 obstacles. The dog needs 2 legs to get the title.

I decided to give this title a try, Dino got his ACT 1 title with ease. I knew he'd enjoy giving this one a shot with me as well! He loves to jump even though I don't set them high. I set the jumps low to keep it easy on him because he is a very big saint. AKC had a handful of courses to choose from. I chose the ones that flowed best for me, I knew he would do whatever course was set up. In true Dino fashion, he always finishes his courses with zoomies.

I sent them off to AKC, hoping for passing scores. A few weeks later, I checked my email not only to find out that he passed, but he got perfect scores on both of them! It was a really fun activity to do with him. He loves to work and always makes it fun.
