Sully`s love for Dock Diving is stronger than ever. He continues to live for jumping off the dock in any format. Since he loves it, we keep doing it. Hydrodash is one of the disciplines in dock diving. This requires the dog to jump off the dock and swim towards the toy at the end of the pool. The score comes from the time of them jumping, grabbing, and swimming back to the dock. The faster the time gets the highest score. Sully loves this sport and will do anything to get that toy. The Hydrodash Novice Advanced (HDNA) title comes when the dog gets 15 legs in the Novice division, which is 21.000 - 39.999 seconds.

Sully earned his title at the same place and month he first got his first leg in Hydrodash, American K9 Country his home dock. He earned this title on June 26, 2021.

To add, the week before Sully competed on the North East Mobile dock and earned a high score which gave him an invite to Regionals for Hydrodash! That invite was his third invite for the 2021 Regionals. He is now the 1st Saint Bernard to have earned an invite for all 3 disciplines. I am beyond proud and blessed to be a part of his journey.
