Sully's passion for dock diving continues. He is particularly fond of Air Retrieve. Air Retrieve is where the toy/bumper is hung 4 feet above the water and a certain distance away from the dock. The dog must successfully knock off the toy/bumper for it to be counted. The toy is moved out in foot increments. So if the dog successfully grabs or knocks down the bumper at 10', they then try to knock it down at 11'. It is truly a test of the dog's drive and stamina. The senior division is anywhere from 14' to 17' away from the dock. Sully is shocked me and jumped out of his junior division into Senior with a 15' PB.

In order to receive this title, the dog must receive 5 scores in this division. He received this on August 20, 2021. He never ceases to amaze me by always beating his personal bests and doing what I thought impossible. I hope he continues to have fun and enjoy this as much as me.
